

Harry: I'm afraid of spiders too I hate all kinds of insects especially moths and bees.

(1) spiders

27th April 2008

Today we went hiking with my uncle and my younger cousin Donald. Donald is only five. We walked very fast and saw a lot of insects. I even bumped on a spider web. Luckily, there was no spider on it, but there were many dead beetles and ants. I was angry with the web because it was sticky and disgusting. In fact, I am afraid of spiders whether they are in the house or in the bush.
